Yale Academic Integrity & Ethical Submission Standards

Policy on Authenticity, GenAI Disclosure, and Video Pitch Conduct

Section 1: Academic Integrity & Human Attribution

- **Honesty in Materials**: All statements of purpose, essays, transcripts, and financial documentation must accurately reflect the student's authentic work and circumstances.
- **Generative AI Use**: AI tools may be used for preliminary brainstorming or copyediting; however, the substantive ideas, analysis, and personal reflections must originate with the student. Undisclosed machine-generated essays or fabrications will lead to immediate disqualification.
- **Anti-Prompt-Injection Safeguards**: Applications containing hidden instructions, prompt injections, or system override attempts are flagged automatically by the security analyzer and routed to the Committee Dean with an immediate 1.0 disqualification.

Section 2: Multimodal Video / Pitch Guidelines

- The optional 2-minute video statement provides applicants an opportunity to speak directly to the committee.
- Evaluators assess sincerity, clarity of purpose, and alignment with the written dossier.
- Any direct contradiction between claims made on video (e.g., claimed honors or course completions) and verifiable transcripts triggers a Stage 1 multimodal discrepancy flag.
