Call for Proposals: Horizon-AI-2026-ST-01

Title: Collaborative Safe and Autonomous Deep Learning Systems

Section 1: Call Overview and Objectives

The Horizon-AI Framework Programme invites proposals aiming to advance safe, robust, and verifiable deep learning systems for critical industrial and public automation.

Projects must bring together multidisciplinary research teams and propose verifiable advances over the state of the art in machine intelligence, agentic architectures, and multimodal perception.

- **Funding Body**: European Innovation & Research Executive Agency (EIREA).
- **Total Call Envelope**: €45,000,000.
- **Maximum Requested Grant per Project**: €3,000,000.
- **Project Duration**: 24 to 36 months.
- **Application Deadline**: October 15, 2026, 17:00 Brussels Time.
- **Mandatory Submission Artifacts**:

1. Administrative and Financial Proposal (Part A & Part B PDF).
2. Scanned or digitally certified detailed institutional budget table.

Section 2: General Eligibility Criteria

To be deemed eligible for scientific review, proposals must satisfy:

1. **Consortium Composition**: Minimum of 3 independent legal entities from 3 different eligible member countries.
2. **Page Limit**: Part B must not exceed 40 pages (excluding references).
3. **Completeness**: Submissions lacking the certified budget table or required sections will be rejected without scientific review.
4. **Originality**: The proposal must be original work. Undisclosed plagiarism or duplicate funding applications across agencies will lead to immediate disqualification.
